WORK EXPERIENCE

Freelance

2023 – 2025

Front-End Development

Primarily built websites for clients using React.js and Tailwind CSS, except when HTML/CSS was requested. Developed e-commerce projects like the www.helloFamily.rs web store using WordPress.

ArabianChain Tech

2022 - 2023

Front-End Development

Developed the company's main website and contributed to key projects, including a mining pool, blockchain explorer, web wallet, desktop wallet and Telegram bot.

LibertasGH

2020-2022

Front-End Development

In addition to blockchain projects, LibertasGH also provided web development services. I was involved in creating websites and web applications for various companies alongside blockchain development.
